NOTES

1. These tables provide guidelines on how to calculate contributions for employees paid MONTHLY, WEEKLY AND FORTNIGHTLY at intervals of K20 for purpose of convenience only.

Most often the amount of employee's total pensionable earnings on which contributions are calculated will be a figure within the interval. The amounts of the employee's share shall be calculated respectively as five percent of the employee's total pensionable earnings.

2. Earnings and contribution amounts are NOT to be rounded off to the nearest Kwacha before applying the percentage.

3. Rectification of improper attribution of earnings an employer or self-employed worker has altered the where pattern of payment of earnings to avoid or minimize payment of contributions, the Authority may deem such payments to have been made in payment periods which correspond to the work or services provided by the worker and levy contributions accordingly.

4. Calculation of the Social Security Ceiling. The Social Security Ceiling in effect throughout any year is equal to four times the National Average Monthly Earnings computed by the Central Statistical Office for the second quarter of the previous year.
